	Zone 2 Fundy Shore and Saint John Area	Province New Brunswick
Needed home care services in the last 12 months, but did not receive any % 2020	2.9	3.0

About this Table

Content and description

Data about the experience citizens reported throughout their journey while interacting with the New Brunswick health system.

Indicators are organized by the different types of services and capture citizens' reported experience regarding availability, visits, wait times, communication and overall care.

These services include: Family doctors, nurse practitioners, after-hours or walk-in clinic, community health centres, Tele-Care 811, hospital emergency room and ambulance services, pharmacists and medication, hospitals, mental health, specialists and diagnostic tests, dentists and home care services.

Why it is important

By better understanding the experience of citizens using each type of health service, we can better assess the quality of programs and services.

Availability of the data

The information for this data table is available at different geographical levels as well as by demographic groups. More information is available on our [Primary Health Survey](#) page.

Note about 2020 data

The 2020 edition of the Primary Health Survey (PHS) was conducted during the COVID-19 pandemic. While the pandemic did not influence the survey's response rate, the NBHC had to assess the impact of surveying during the pandemic. Accordingly, advanced statistical analyses were performed to allow for comparison between the results obtained in 2020 and those obtained in previous PHS cycles. Some indicators had to be suppressed in the 2020 edition as part of this process. Despite these analyses, users are advised to use the 2020 data with caution, especially when creating estimates for small sub-populations or when comparing it to other PHS editions.
