Patient had a good experience overall % 2019	93.3	81.6	82.3

About this Table

Content and description

Indicators on the experience of citizens reported throughout their journey while interacting with New Brunswick hospitals.

Indicators are organized by different categories and capture citizens' reported experience regarding admissions into the hospital, communication with doctors, nurses and other staff, room environment and services provided, responsiveness of staff, coordination of care, involvement in decision-making, language of service, pain control, safety, discharge and overall experience.

Why is it important?

By better understanding the experience of citizens with New Brunswick hospitals, we can better assess the quality of services. This also encourages decision-makers and planners to create performance targets based on care experience survey indicators.

Availability of the data

The information in this data table is available by hospital as well as by demographic groups. More information is available on our [Hospital Acute Care Survey](#) page.
