Immigrants	62.8	n/a

About

This indicator is the percentage of students in grades 4 and 5 who reported drinking a non-nutritious beverage 1 or more times, on the day before the survey.

Source

Student Wellness and Education Survey, Grades 4-5

Calculations

This indicator is calculated by dividing the number of respondents who answered "1 time, 2 times, 3 times, 4 times, 5 times, 6 times or 7+ times" by the number of respondents who answered "none, 1 time, 2 times, 3 times, 4 times, 5 times, 6 times or 7+ times" to the question: Yesterday, how many times did you drink pop, flavoured water, sports drinks, energy drinks, Slushies®, juice, etc.?

Notes

The 2019-2020 edition of this survey was conducted during the COVID-19 pandemic. Since the number of schools that participated in 2019-2020 is much lower than other editions of the survey, results at the provincial level were deemed not representative of the total student population. Therefore, survey results for New Brunswick, health zones and demographic groups are not available for the 2019-2020 edition. However, 2019-2020 results are available for communities in which the number of participating schools was deemed sufficient to be representative of the student population in that community.
