## About

This indicator is the percentage of students in grades 4 and 5 who have their need for autonomy highly satisfied.

## Source

Student Wellness and Education Survey, Grades 4-5

## Calculations

This indicator is calculated by dividing the number of respondents who have a total autonomy score higher than a specified cutoff by the number of respondents who described their feelings and ideas for at least 2 of the following 3 questionnaire items: 'I feel I have a choice about when and how to do my school work', 'I feel I have a choice about which activities to do with my friends', and 'I feel like I have a choice about when and how to do my household chores'. The response options for these 3 items are not like me, a little like me and a lot like me.

## Notes

Due to a low school participation rate in some areas of the province for the 2025-2026 edition of this survey, survey results are not available for District scolaire francophone Nord-Ouest (school district), Madawaska and North-West Area (health zone), Kedgwick, Saint-Quentin and Grimmer (community), Grand Falls, Saint-Léonard, Drummond Area (community), and Edmundston, Rivière-Verte, Lac Baker Area (community). The 2019-2020 edition of this survey was conducted during the COVID-19 pandemic. Since the number of schools that participated in 2019-2020 is much lower than other editions of the survey, results at the provincial level were deemed not representative of the total student population. Therefore, survey results for New Brunswick, health zones and demographic groups are not available for the 2019-2020 edition. However, 2019-2020 results are available for communities in which the number of participating schools was deemed sufficient to be representative of the student population in that community.
