	Year 2020	Year 2017
Persons with a disability		
With disability	4.3	2.6
Without disability	4.3	2.9

About

This indicator is the percentage of citizens who have a nurse practitioner as their primary care provider.

Source

New Brunswick Health Council, Primary Health Survey

Calculations

This indicator is based on respondents who do not have a family doctor . This indicator is calculated by dividing the number of respondents who answered "yes" by the number of respondents who answered "yes or no" to the question: Do you have a nurse practitioner who manages your medical file and refers you to other medical services?

Notes

The 2020 edition of the Primary Health Survey (PHS) was conducted during the COVID-19 pandemic. While the pandemic did not influence the survey's response rate, NBHC had to assess the impact of surveying during the pandemic. Accordingly, advanced statistical analyses were performed to allow for comparison between the results obtained in 2020 and those obtained in previous PHS cycles. Despite these analyses, users are advised to use the PHS 2020 data with caution, especially when creating estimates for small sub-populations or when comparing it to other PHS editions.

Unit	Interpretation	NBHC code
%	Higher is better	PH_ACCNI_1
