About

This indicator is the percentage of citizens [visiting a community health centre in the last 12 months] who reported that health professionals at the community health centre always involve them in decisions about their health care.

Source

Primary Health Survey and Primary Care Survey

Calculations

This indicator is based on respondents who have visited a community health centre in the last 12 months . This indicator is calculated by dividing the number of respondents who answered "always" by the number of respondents who answered "never, rarely, sometimes, usually or always" to the question: In the last 12 months, how often did the health professionals at the community health centre involve you in decisions about your health care?

Unit	Interpretation	NBHC code
%	Higher is better	PH_APPHA_1
