Less than \$25,000	9.4
\$25,000 to less than \$60,000	7.4

	Year 2020
\$60,000 or more	4.9
Persons with a disability	
Without disability	5.0
With disability	10.9

About

This indicator is the percentage of citizens who reported that they had trouble physically accessing a health care setting (e.g. family doctor's office, health center or clinic, etc.) in the last 12 months.

Source

Primary Health Survey and Primary Care Survey

Calculations

This indicator is calculated by dividing the number of respondents who answered "yes" by the number of respondents who answered "yes or no" to the question: Now think of any difficulties you may have experienced in getting the health care you needed in the last 12 months. In the last 12 months, did you: I) have trouble physically accessing a health care setting (e.g. family doctors office, health center or clinic, etc.)

Notes

The 2020 edition of the Primary Health Survey (PHS) was conducted during the COVID-19 pandemic. While the pandemic did not influence the survey's response rate, NBHC had to assess the impact of surveying during the pandemic. Accordingly, advanced statistical analyses were performed to allow for comparison between the results obtained in 2020 and those obtained in previous PHS cycles. Despite these analyses, users are advised to use the PHS 2020 data with caution, especially when creating estimates for small subpopulations or when comparing it to other PHS editions.

Unit Interpretation NBHC code
% Lower is better PH_BARAC_1
