### **About**

This indicator is the percentage of citizens who strongly agree that their health largely depends on how well they take care of themselves.

## Source

Primary Health Survey and Primary Care Survey

# **Calculations**

This indicator is calculated by dividing the number of respondents who answered "strongly agree" by the number of respondents who answered "strongly disagree, disagree, neutral, agree or strongly agree" to the question: My health largely depends on how well I take care of myself

#### **Notes**

The 2020 edition of the Primary Health Survey (PHS) was conducted during the COVID-19 pandemic. While the pandemic did not influence the survey's response rate, NBHC had to assess the impact of surveying during the pandemic. Accordingly, advanced statistical analyses were performed to allow for comparison between the results obtained in 2020 and those obtained in previous PHS cycles. Despite these analyses, users are advised to use the PHS 2020 data with caution, especially when creating estimates for small subpopulations or when comparing it to other PHS editions.

Unit	Interpretation	NBHC code
%	Higher is better	PH BELDM 1
