Without disability	38.1	37.7
With disability	32.0	32.9

About

This indicator is the percentage of citizens who are overweight (based on self-reported height and weight).

Source

Primary Health Survey and Primary Care Survey

Calculations

This indicator is calculated by dividing the number of respondents who "have a BMI higher than specific cutoff" by the number of respondents who "give their height and their weight" . The BMI is obtained by dividing the weight in kilograms by the height in square metres. Conversions are applied to obtain the correct unit of measure from the following questions: How tall are you without your shoes on? And How much do you weigh?

Unit	Interpretation	NBHC code
%	Lower is better	PH_BMI01_1
