High school or less	36.4	35.8	33.2
Postsecondary	32.3	30.8	29.3
<b>Household income</b>			
Less than \$25,000	34.5	36.0	32.4
\$25,000 to less than \$60,000	36.4	34.2	32.8
\$60,000 or more	32.1	31.0	29.2

	Year 2020	Year 2017	Year 2014
<b>Persons with a disability</b>			
Without disability	30.3	29.8	28.0
With disability	44.6	43.1	40.8

## About

This indicator is the percentage of citizens who are obese (based on self-reported height and weight).

## Source

Primary Health Survey and Primary Care Survey

## Calculations

This indicator is calculated by dividing the number of respondents who "have a BMI higher than specific cutoff" by the number of respondents who "give their height and their weight". The BMI is obtained by dividing the weight in kilograms by the height in square metres. Conversions are applied to obtain the correct unit of measure from the following questions: How tall are you without your shoes on? And How much do you weigh?

## Notes

The 2020 edition of the Primary Health Survey (PHS) was conducted during the COVID-19 pandemic. While the pandemic did not influence the survey's response rate, NBHC had to assess the impact of surveying during the pandemic. Accordingly, advanced statistical analyses were performed to allow for comparison between the results obtained in 2020 and those obtained in previous PHS cycles. Despite these analyses, users are advised to use the PHS 2020 data with caution, especially when creating estimates for small sub-populations or when comparing it to other PHS editions.

---

Unit	Interpretation	NBHC code
%	Lower is better	PH_BMI01_2
