<b>Persons with a disability</b>		
Without disability	<b>67.9</b>	<b>65.7</b>
With disability	<b>75.1</b>	<b>73.6</b>

## About

This indicator is the percentage of citizens who are overweight or obese (based on self-reported height and weight).

## Source

Primary Health Survey and Primary Care Survey

## Calculations

This indicator is calculated by dividing the number of respondents who "have a BMI higher than specific cutoff" by the number of respondents who "give their height and their weight". The BMI is obtained by dividing the weight in kilograms by the height in square metres. Conversions are applied to obtain the correct unit of measure from the following questions: How tall are you without your shoes on? And How much do you weigh?

Unit	Interpretation	NBHC code
%	Lower is better	PH_BMI01_3
