\$60,000 or more	79.8

Year  
2020

**Persons with a disability**

Without disability	71.8
With disability	60.0

## About

This indicator is the percentage of citizens who have seen or talked to a dental professional, such as a dentist, a dental hygienist or a denturologist in the last 12 months.

## Source

New Brunswick Health Council, Primary Health Survey

## Calculations

This indicator is calculated by dividing the number of respondents who answered "yes" by the number of respondents who answered "yes or no" to the question: In the last 12 months, have you seen or talked to a dental professional, such as a dentist, a dental hygienist or a denturologist?

## Notes

The 2020 edition of the Primary Health Survey (PHS) was conducted during the COVID-19 pandemic. While the pandemic did not influence the survey's response rate, NBHC had to assess the impact of surveying during the pandemic. Accordingly, advanced statistical analyses were performed to allow for comparison between the results obtained in 2020 and those obtained in previous PHS cycles. Despite these analyses, users are advised to use the PHS 2020 data with caution, especially when creating estimates for small sub-populations or when comparing it to other PHS editions.
