## About

This indicator is the percentage of citizens who have no insurance coverage for eye glasses or contact lenses.

## Source

Primary Health Survey and Primary Care Survey

## Calculations

This indicator is calculated by dividing the number of respondents who answered "no, I do not have an insurance plan" by the number of respondents who answered "no, I do not have an insurance plan, yes, it is a plan sponsored by the government, yes, it is a plan sponsored by my employer or yes, it is a private plan" to the question: Do you have insurance that covers all or part of the cost of: c) Eye glasses or contact lenses?

## Notes

The 2020 edition of the Primary Health Survey (PHS) was conducted during the COVID-19 pandemic. While the pandemic did not influence the survey's response rate, NBHC had to assess the impact of surveying during the pandemic. Accordingly, advanced statistical analyses were performed to allow for comparison between the results obtained in 2020 and those obtained in previous PHS cycles. Despite these analyses, users are advised to use the PHS 2020 data with caution, especially when creating estimates for small sub-populations or when comparing it to other PHS editions.
