\$60,000 or more	95.6

### Persons with a disability

Without disability	<b>96.3</b>
With disability	<b>72.8</b>

## About

This indicator is the percentage of citizens who reported being satisfied or very satisfied with their life (score of 6 or more on a scale from 0 to 10).

## Source

Primary Health Survey and Primary Care Survey

## Calculations

This indicator is calculated by dividing the number of respondents who answered "6, 7, 8, 9 or 10" by the number of respondents who answered "0 to 10" to the question: On a scale from "0" as the worst possible life for you and "10" as the best possible life for you, in general, where do you feel you stand at the moment?

## Notes

The 2020 edition of the Primary Health Survey (PHS) was conducted during the COVID-19 pandemic. While the pandemic did not influence the survey's response rate, NBHC had to assess the impact of surveying during the pandemic. Accordingly, advanced statistical analyses were performed to allow for comparison between the results obtained in 2020 and those obtained in previous PHS cycles. Despite these analyses, users are advised to use the PHS 2020 data with caution, especially when creating estimates for small sub-populations or when comparing it to other PHS editions.

Unit	Interpretation	NBHC code
%	Higher is better	PH_LIF01_1
