With disability	67.7	74.3	74.1	n/a

## About

This indicator is the percentage of citizens [with a preference for services in French] who always received the health care services they needed in the official language of their choice.

## Source

Primary Health Survey and Primary Care Survey

## Calculations

This indicator is based on respondents who have a preference for services in French . This indicator is calculated by dividing the number of respondents who answered "always" by the number of respondents who answered "never, rarely, sometimes, usually or always" to the question: In the last 12 months, how often did you receive the health care service you needed in the official language (English or French) of your choice?

## Notes

Due to changes in content and methodology, this indicator has been discontinued. The following indicator(s) are related to this one and can be typed into the indicator search box on our website: PC\_LINAH\_3, PC\_LINED\_3, PC\_LINFD\_3, PC\_LINHL\_3, PC\_LINOT\_3, PC\_LINPY\_3, PC\_LINSP\_3, PC\_LINTC\_3, PC\_LINVC\_3, PC\_LINWC\_3. The 2020 edition of the Primary Health Survey (PHS) was conducted during the COVID-19 pandemic. While the pandemic did not influence the survey's response rate, NBHC had to assess the impact of surveying during the pandemic. Accordingly, advanced statistical analyses were performed to allow for comparison between the results obtained in 2020 and those obtained in previous PHS cycles. Despite these analyses, users are advised to use the PHS 2020 data with caution, especially when creating estimates for small sub-populations or when comparing it to other PHS editions.
