\$60,000 or more	5.7

Year  
2020

**Persons with a disability**

Without disability	<b>5.8</b>
With disability	<b>12.7</b>

## About

This indicator is the percentage of citizens who reported using cannabis every day in the last 12 months.

## Source

Primary Health Survey and Primary Care Survey

## Calculations

This indicator is calculated by dividing the number of respondents who answered "every day" by the number of respondents who answered "I have never used Cannabis, I have used cannabis but not in the last 12 months, less than once a month, once a month, 2 or 3 times a month, once a week, 2 or 3 times a week, 4 to 6 times a week or every day" to the question: In the last 12 months, how often did you use marijuana or cannabis (a joint, pot, weed, hash)?

## Notes

The 2020 edition of the Primary Health Survey (PHS) was conducted during the COVID-19 pandemic. While the pandemic did not influence the survey's response rate, NBHC had to assess the impact of surveying during the pandemic. Accordingly, advanced statistical analyses were performed to allow for comparison between the results obtained in 2020 and those obtained in previous PHS cycles. Despite these analyses, users are advised to use the PHS 2020 data with caution, especially when creating estimates for small sub-populations or when comparing it to other PHS editions.

Unit	Interpretation	NBHC code
%	Lower is better	PH_MAR01_2
