Persons with a disability		
Without disability	6.6	6.6
With disability	21.5	22.0

About

This indicator is the percentage of citizens who reported that they or someone else in their household has problems with memory loss.

Source

Primary Health Survey and Primary Care Survey

Calculations

This indicator is calculated by dividing the number of respondents who answered "yes, myself or yes, someone else in my household" by the number of respondents who answered "yes, myself, yes, someone else in my household or no" to the question: Do you or anyone in your household have problems with memory loss?

Notes

The 2020 edition of the Primary Health Survey (PHS) was conducted during the COVID-19 pandemic. While the pandemic did not influence the survey's response rate, NBHC had to assess the impact of surveying during the pandemic. Accordingly, advanced statistical analyses were performed to allow for comparison between the results obtained in 2020 and those obtained in previous PHS cycles. Despite these analyses, users are advised to use the PHS 2020 data with caution, especially when creating estimates for small subpopulations or when comparing it to other PHS editions.

Unit	Interpretation	NBHC code
%	Lower is better	PH MEM01 1
