Persons with a disability				
Without disability	40.4	41.6	41.1	n/a
With disability	25.2	27.4	29.6	n/a

### About

This indicator is the percentage of citizens [with any chronic health condition asked in the questionnaire] who strongly agree that they know how to try to help prevent further problems with their health condition.

#### Source

Primary Health Survey and Primary Care Survey

#### Calculations

This indicator is based on respondents who have one (1) or more of the following chronic health conditions: arthritis, asthma, chronic pain, Emphysema or COPD (chronic obstructive pulmonary disease), cancer, diabetes, depression, A mood disorder other than depression, such as bipolar disorder, mania, manic depression, or dysthymia, heart disease, stroke, high blood pressure or hypertension or gastric reflux (GERD). This indicator is calculated by dividing the number of respondents who answered "strongly Agree" by the number of respondents who answered "strongly Agree" to the question: After I read the following statement, please tell me if you strongly agree, agree, disagree or strongly disagree : "I know how to try to help prevent further problems with my health condition".

#### Notes

The 2020 edition of the Primary Health Survey (PHS) was conducted during the COVID-19 pandemic. While the pandemic did not influence the survey's response rate, NBHC had to assess the impact of surveying during the pandemic. Accordingly, advanced statistical analyses were performed to allow for comparison between the results obtained in 2020 and those obtained in previous PHS cycles. Despite these analyses, users are advised to use the PHS 2020 data with caution, especially when creating estimates for small sub-populations or when comparing it to other PHS editions.
