## **About**

This indicator is the percentage of citizens who are daily smokers.

## Source

Primary Health Survey and Primary Care Survey

## **Calculations**

This indicator is calculated by dividing the number of respondents who answered "daily smoker" by the number of respondents who answered "non-smoker, occasional smoker or daily smoker" to the question: What is your current smoking behavior?

#### **Notes**

The 2020 edition of the Primary Health Survey (PHS) was conducted during the COVID-19 pandemic. While the pandemic did not influence the survey's response rate, NBHC had to assess the impact of surveying during the pandemic. Accordingly, advanced statistical analyses were performed to allow for comparison between the results obtained in 2020 and those obtained in previous PHS cycles. Despite these analyses, users are advised to use the PHS 2020 data with caution, especially when creating estimates for small subpopulations or when comparing it to other PHS editions.

Unit	Interpretation	NBHC code
%	Lower is better	PH_SMO01_2
