| Postsecondary |  | 89.5 | 90.8 | 93.0 |

Household income

| Less than $\$ 25,000$ | 78.6 | 83.7 | 88.1 | 90.1 |
| :--- | :---: | :---: | :---: | :---: |
| $\$ 25,000$ to less than $\$ 60,000$ | 86.3 | 88.3 | 91.7 | 93.8 |
| $\$ 60,000$ or more | 91.2 | 92.3 | 93.5 | 95.6 |

| Year | Year | Year | Year |
| :--- | :--- | :--- | :--- |
| 2020 | 2017 | 2014 | 2011 |

## Persons with a disability

| Without disability | 87.0 | 87.6 | 90.3 | $\mathrm{n} / \mathrm{a}$ |
| :--- | :---: | :---: | :---: | :---: | :---: |
| With disability 87.3 | 89.3 | 93.1 | $\mathrm{n} / \mathrm{a}$ |  |

## About

This indicator is the percentage of citizens [with diabetes, heart disease, stroke or high blood pressure] who had a test or measurement for blood pressure in the last 12 months.

## Source

Primary Health Survey and Primary Care Survey

## Calculations

This indicator is based on respondents who have diabetes, heart disease, stroke or high blood pressure. This indicator is calculated by dividing the number of respondents who answered "yes" by the number of respondents who answered "yes or no" to the question: In the past 12 months, did you get the following tests or measurements from a health professional: a) Blood pressure measurement

## Notes

The 2020 edition of the Primary Health Survey (PHS) was conducted during the COVID-19 pandemic. While the pandemic did not influence the survey's response rate, NBHC had to assess the impact of surveying during the pandemic. Accordingly, advanced statistical analyses were performed to allow for comparison between the results obtained in 2020 and those obtained in previous PHS cycles. Despite these analyses, users are advised to use the PHS 2020 data with caution, especially when creating estimates for small subpopulations or when comparing it to other PHS editions.
