About

This indicator is the percentage of citizens who most often call Tele-Care 811 when sick or in need of care from a health professional.

Source

Primary Health Survey and Primary Care Survey

Calculations

This indicator is calculated by dividing the number of respondents who answered "call Tele-Care 811" by the number of respondents who answered "see your personal family doctor at his or her office or in a home visit, go to an after-hours clinic or a walk-in clinic for non-emergency health care needs, go to a community health centre where you can see different health care professionals, go to a hospital emergency department, see your nurse practitioner at his or her office or in a home visit, go to an alternative practitioner, like a chiropractor, homeopath, or massage therapist, call Tele-Care 811, go to your community pharmacist or go to some other place of car to the question: Which one of the following best describes what you do when you are sick or need care from a doctor, nurse or other health professional?

Unit NBHC code % PH_USEPB_7
