About

This indicator is the percentage of citizens who most often go to some other place of care (not listed in the questionnaire) when sick or in need of care from a health professional.

Source

Primary Health Survey and Primary Care Survey

Calculations

This indicator is calculated by dividing the number of respondents who answered "go to some other place of care" by the number of respondents who answered "see your personal family doctor at his or her office or in a home visit, go to an after-hours clinic or a walk-in clinic for non-emergency health care needs, go to a community health centre where you can see different health care professionals, go to a hospital emergency department, see your nurse practitioner at his or her office or in a home visit, go to an alternative practitioner, like a chiropractor, homeopath, or massage therapist, call Tele-Care 811, go to your community pharmacist or go to some other place of car to the question: Which one of the following best describes what you do when you are sick or need care from a doctor, nurse or other health professional?
