About this Table

Content and description

Data about the experience persons with a disability reported throughout their journey while interacting with the New Brunswick health system.

The indicators are organized based on the [population health model](#) and capture the experience that persons with a disability had with health services regarding availability, visits, wait times, communication and overall care.

Why it is important

By better understanding the needs and experiences of persons with a disability while accessing required health services, we can better assess the quality of programs and services.
