 **Access to specialized services**

Has seen a specialist in the last 12 months %

Waited less than 1 month for a first visit %

Has required a diagnostic test %

Waited less than 1 month for a diagnostic test %

 **Access to home care services**

Needed home care services in the last 12 months, but did not receive any %

 **Management of chronic health conditions**

Knows what their prescribed medications do (strongly agrees) %

Confidence in managing their health condition, very confident %

About this Table

Content and description

Data about the experience persons with a disability reported throughout their journey while interacting with the New Brunswick health system.

The indicators are organized based on the [population health model](#) and capture the experience that persons with a disability had with health services regarding availability, visits, wait times, communication and overall care.

Why it is important

By better understanding the needs and experiences of persons with a disability while accessing required health services, we can better assess the quality of programs and services.
