 Identifies with racialized groups % | 2025-2026 **20.8**

Food poverty

Food poverty refers to youth who report often or always going to school or to bed hungry because there is not enough food at home.

 Experiencing food poverty % | 2025-2026 **5.2**

About this Table

Content and description

This table presents data collected from students in grades 6 to 12 through the New Brunswick Student Wellness and Education Survey (SWES). It contains self-reported information regarding the demographic context of New Brunswick students in grades 6 to 12. Topics include language, sex, gender identity, 2SLGBTQIA+ status, Indigenous identity, racialized groups, food poverty, as well as context around survey participation. The questionnaire comprises modules, which means that certain questions are asked every other cycle.

Why it is important

Only when we understand who our students are and where they are coming from can we support their health and educational needs.

Availability of the data

The information in this data table is available by school district, school sector and overall New Brunswick, as well as by the seven (7) New Brunswick health zones and 33 communities created by the NBHC. More information is available on our [New Brunswick Student Wellness and Education Survey](#) page.

Note about 2021-2022 data

The methodology of the 2021-2022 edition of the SWES was significantly changed. This was the first cycle to adopt online data collection, and a shorter data collection period. Also, the survey questionnaire was thoroughly revised for this cycle. Many questions were removed or amended. As such, some indicators are no longer comparable to previous years, and caution needs to be exercised when attempting to compare the results of the survey with results from prior survey cycles outside of what is displayed in this Data Table. The 2021-2022 edition of the SWES was conducted during the COVID-19 pandemic. Some schools may have had lower participation from their students than previous years. Some students may have participated to the survey during periods of remote learning.

Note about demographic groups

In 2023, the NBHC undertook a review of the demographic questions in its surveys to more accurately report on the experience of citizens who identify with particular groups. As such, starting in 2024, all demographic groups (characteristics) have been adjusted to reflect this change. Data tables and indicator pages were adjusted to allow for trending where applicable.
