Social factors

Resilience

Resilience is a strength that will help youth bounce back from adversity, but it is not solely something residing inside the individual. Rather, it is a socio-ecological model where individual strengths, along with one's caregivers and community, make it possible for a youth to find and access the right supports, programs and services for their needs. Below are students reporting "A lot."

About this Table

Content and description

This table presents data collected from students in grades 6 to 12 through the New Brunswick Student Wellness and Education Survey (SWES). It contains self-reported information regarding the social and emotional development of New Brunswick students in grades 6 to 12. Topics include mental fitness, social factors like resilience, pro-social behaviours, oppositional behaviours and bullying, mental health, and resources for mental and emotional health.

The questionnaire comprises modules, which means that certain questions are asked every other cycle.

Why it is important

Only when we understand who our students are and what their needs are can we better plan for services and allocate resources to meet their health and educational needs.

Availability of the data

The information in this data table is available by school district, school sector and overall New Brunswick, by the seven (7) New Brunswick health zones and 33 communities created by the NBHC, as well as by demographic groups. More information is available on our [New Brunswick Student Wellness and Education Survey](#) page.

Note about demographic groups:

In 2023, the NBHC undertook a review of the demographic questions in its surveys to more accurately report on the experience of citizens who identify with particular groups. As such, starting in 2024, all demographic groups (characteristics) have been adjusted to reflect this change. Data tables and indicator pages were adjusted to allow for trending where applicable.
