<b>Care received from an informal caregiver</b>			
Lives alone %   2024	26.5	35.1	31.3
<b>In the last 2 months</b>			
Received help from an informal caregiver %   2024	72.9	69.1	68.8
Received help at least once a week %   2024	86.6	86.4	86.0

## About this Table

### Content and description

Data about self-reported health, chronic health conditions, and whether citizens received care from informal caregivers.

### Why is it important?

By better understanding the characteristics of citizens receiving home care services in New Brunswick, we can better understand their needs, thus provide more citizen-centered care.

### Availability of the data

The information for this data table is available at different geographical levels as well as by demographic groups. More information is available on [our Home Care Survey page](#).

### Note about demographic groups

In 2023, the NBHC undertook a review of the demographic questions in its surveys to more accurately report on the experience of citizens who identify with particular groups. As such, starting in 2024, all demographic groups (characteristics) have been adjusted to reflect this change. Data tables and indicator pages were adjusted to allow for trending where applicable.
