\$60,000 or more	28.5	31.3	22.8	40.3

## About

This indicator is the percentage of citizens receiving home care services who reported that they have been diagnosed or treated for arthritis.

## Source

Home Care Survey

## Calculations

This indicator is calculated by dividing the number of respondents who answered "yes" by the number of respondents who answered "yes or no" to the question: Has a doctor or any other health professional ever diagnosed you with or treated you for any of the following chronic health conditions? Please select all that apply: arthritis, asthma, emphysema or COPD (chronic obstructive pulmonary disease), chronic pain, cancer, diabetes, depression, heart disease, stroke, high blood pressure or hypertension, a mood disorder other than depression, such as bipolar disorder, mania, manic depression or dysthymia, gastric reflux (or GERD), alzheimer's disease or another form of dementia, anxiety or high cholesterol.

## Notes

The 2021 edition of the Home Care Survey was conducted during the COVID-19 pandemic. While the pandemic did not influence the survey's response rate, users are advised to use the survey data with caution, especially when creating estimates for small sub-populations or when comparing it to other editions of the survey.
