About

This indicator is the percentage of citizens receiving home care services who reported that their mother or father helped them the most with their home care in the last 2 months [among those who receive help from a family caregiver].

Source

Home Care Survey

Calculations

This indicator is based on respondents who receive help from a family caregiver . This indicator is calculated by dividing the number of respondents who answered "yes" by the number of respondents who answered "yes or no" to the question: In the last 2 months, who has helped you the most with your home care: mother or father

Notes

The 2021 edition of the Home Care Survey was conducted during the COVID-19 pandemic. While the pandemic did not influence the survey’s response rate, users are advised to use the survey data with caution, especially when creating estimates for small sub-populations or when comparing it to other editions of the survey.
