About

This indicator is the percentage of citizens receiving home care services who are very confident in controlling and managing their health condition.

Source

Home Care Survey

Calculations

This indicator is calculated by dividing the number of respondents who answered "very confident" by the number of respondents who answered "not at all confident, not very confident, confident or very confident" to the question: How confident are you that you can control and manage your health condition?

Notes

The 2021 edition of the Home Care Survey was conducted during the COVID-19 pandemic. While the pandemic did not influence the survey's response rate, users are advised to use the survey data with caution, especially when creating estimates for small sub-populations or when comparing it to other editions of the survey.
