## About

This indicator is the percentage of citizens receiving home care services from a home support worker who reported that their home support worker did not take into account their spiritual or cultural values.

## Source

New Brunswick Health Council, Home Care Survey

## Calculations

This indicator is calculated by dividing the number of respondents who answered "yes" by the number of respondents who answered "yes or no" to the question: In the last 12 months, was there a time when home support workers did not take your spiritual or cultural values into account?

## Notes

The 2021 edition of the Home Care Survey was conducted during the COVID-19 pandemic. While the pandemic did not influence the survey's response rate, users are advised to use the survey data with caution, especially when creating estimates for small sub-populations or when comparing it to other editions of the survey.
