About

This indicator is the percentage of citizens receiving home care services from a home support worker who strongly agree that their family caregiver received information that they wanted from their home support worker or agency when they needed it.

Source

Home Care Survey

Calculations

This indicator is calculated by dividing the number of respondents who answered "strongly agree" by the number of respondents who answered "strongly disagree, disagree, neutral, agree or strongly agree" to the question: In the last 12 months, my family or friends who help with my care were given the information that they wanted when they needed it.

Notes

The 2021 edition of the Home Care Survey was conducted during the COVID-19 pandemic. While the pandemic did not influence the survey's response rate, users are advised to use the survey data with caution, especially when creating estimates for small sub-populations or when comparing it to other editions of the survey.
