About

This indicator is the percentage of citizens receiving home care services from a home support worker who reported that a friend, family member or volunteer helped them with their home care in the last 2 months.

Source

Home Care Survey

Calculations

This indicator is calculated by dividing the number of respondents who answered "yes" by the number of respondents who answered "yes or no" to the question: In the last 2 months, did a friend, family member or volunteer help you with your home care?

Notes

The 2021 edition of the Home Care Survey was conducted during the COVID-19 pandemic. While the pandemic did not influence the survey's response rate, users are advised to use the survey data with caution, especially when creating estimates for small sub-populations or when comparing it to other editions of the survey.
