#### **About**

This indicator is the percentage of citizens receiving home care services from a home support worker who reported that they had problems with the services they received from their home support worker in the last 2 months.

#### Source

Home Care Survey

### **Calculations**

This indicator is calculated by dividing the number of respondents who answered "yes" by the number of respondents who answered "yes or no" to the question: In the last 2 months, did you have any problems with the care you got from your home support worker?

#### **Notes**

The 2021 edition of the Home Care Survey was conducted during the COVID-19 pandemic. While the pandemic did not influence the survey's response rate, users are advised to use the survey data with caution, especially when creating estimates for small sub-populations or when comparing it to other editions of the survey.
