About

This indicator is the percentage of citizens receiving home care services from a home support worker who reported that these services were scheduled at a time that was convenient for them in the last 2 months.

Source

Home Care Survey

Calculations

This indicator is calculated by dividing the number of respondents who answered "always" by the number of respondents who answered "never, rarely, sometimes, most of the time or always" to the question: In the last 2 months, how often were your home support visits scheduled at a time that was convenient for you?

Notes

The 2021 edition of the Home Care Survey was conducted during the COVID-19 pandemic. While the pandemic did not influence the survey's response rate, users are advised to use the survey data with caution, especially when creating estimates for small sub-populations or when comparing it to other editions of the survey.
