<b>Household income</b>	
Less than \$25,000	14.5
\$25,000 to less than \$60,000	13.2
\$60,000 or more	S

### About

This indicator is the percentage of citizens receiving home care services from a home support worker who reported that more could be done with respect to home support services to help them stay at home in the last 2 months.

### Source

Home Care Survey

### Calculations

This indicator is calculated by dividing the number of respondents who answered "yes" by the number of respondents who answered "yes or no" to the question: Thinking of the home support services you received in the last 2 months, is there anything else that could have been done to help you stay at home?

### Notes

The 2021 edition of the Home Care Survey was conducted during the COVID-19 pandemic. While the pandemic did not influence the survey's response rate, users are advised to use the survey data with caution, especially when creating estimates for small sub-populations or when comparing it to other editions of the survey.
