### About

This indicator is the percentage of citizens receiving home care services from the Extra-Mural Program who are in the age group: 65 or more.

### Source

Home Care Survey

### Calculations

This indicator is calculated by dividing the number of respondents who "are in the age category 65 or more" by the "total number of respondents", based on administrative data.

### Notes

The 2021 edition of the Home Care Survey was conducted during the COVID-19 pandemic. While the pandemic did not influence the survey's response rate, users are advised to use the survey data with caution, especially when creating estimates for small sub-populations or when comparing it to other editions of the survey.
