About

This indicator is the percentage of citizens receiving home care services from the Extra-Mural Program who strongly agree that the staff discussed with them about the type of information that could be shared with family or friends.

Source

Home Care Survey

Calculations

This indicator is calculated by dividing the number of respondents who answered "strongly agree" by the number of respondents who answered "strongly disagree, disagree, neutral, agree or strongly agree" to the question: In the last 12 months, the Extra-Mural staff and I discussed the type of information they could share with my family and friends.

Notes

The 2021 edition of the Home Care Survey was conducted during the COVID-19 pandemic. While the pandemic did not influence the survey's response rate, users are advised to use the survey data with caution, especially when creating estimates for small sub-populations or when comparing it to other editions of the survey.
