## About

This indicator is the percentage of citizens receiving home care services from the Extra-Mural Program who have experienced positive continuity of care across hospital services, home care services and primary health services.

## Source

Home Care Survey

## Calculations

This indicator combines the responses to the following 3 individual questions related to the continuity of care: Did the staff at the hospital or rehabilitation center explain to you what services you would be getting? '(yes/no)', Does your personal family doctor or nurse practitioner seem informed and up-to-date about your home care services? '(yes/no)' and In the last 2 months, how often did Extra-Mural staff seem informed and up-to-date about all the care or treatment you got at home? '(never, sometimes, usually or always)'. This indicator is calculated by dividing the number of respondents who answered 'yes', 'yes' and 'always' by the total number of respondents who answered all 3 questions.

Unit	Interpretation	NBHC code
%	Higher is better	XM_CRD03_1
