About

This indicator is the percentage of citizens receiving home care services from the Extra-Mural Program and from an informal caregiver who reported that someone else helped them the most with their home care in the last 2 months.

Source

Home Care Survey

Calculations

This indicator is based on respondents who receive help from informal caregivers. This indicator is calculated by dividing the number of respondents who answered "yes" by the number of respondents who answered "yes or no" to the question: In the last 2 months, who has helped you the most with your home care: other family member
