About

This indicator is the percentage of citizens receiving home care services from the Extra-Mural Program who reported that they were admitted to the hospital in the last 12 months for a condition that they felt could have been prevented with better services from this program.

Source

Home Care Survey

Calculations

This indicator is calculated by dividing the number of respondents who answered "yes" by the number of respondents who answered "yes or no" to the question: In the last 12 months, were you admitted to the hospital for a condition that you feel could have been prevented with better services from the Extra-Mural Program?
