### About

This indicator is the percentage of citizens receiving home care services from the Extra-Mural Program who reported that they were admitted to the hospital in the last 12 months for a condition that they felt could have been prevented with better services from this program.

### Source

Home Care Survey

### Calculations

This indicator is calculated by dividing the number of respondents who answered "yes" by the number of respondents who answered "yes or no" to the question: In the last 12 months, were you admitted to the hospital for a condition that you feel could have been prevented with better services from the Extra-Mural Program?

---

Unit	Interpretation	NBHC code
%	Lower is better	XM_HSP06_1
