## About

This indicator is the percentage of citizens receiving home care services from the Extra-Mural Program who reported that when they first started receiving services, someone from the program offered to give them services in the language of their choice (English or French).

## Source

Home Care Survey

## Calculations

This indicator is calculated by dividing the number of respondents who answered "yes" by the number of respondents who answered "yes or no" to the question: When you first started receiving home care services from the Extra-Mural Program, did someone from the program offer to give you these services in the language (English or French) of your choice?

## Notes

The 2021 edition of the Home Care Survey was conducted during the COVID-19 pandemic. While the pandemic did not influence the survey's response rate, users are advised to use the survey data with caution, especially when creating estimates for small sub-populations or when comparing it to other editions of the survey.
