\$60,000 or more	56.8	65.9	41.7

About

This indicator is the percentage of citizens receiving home care services from the Extra-Mural Program [and taking new prescription medications] who reported that the staff talked with them about when to take their new prescription medications in the last 2 months.

Source

Home Care Survey

Calculations

This indicator is based on respondents who had taken any new prescription medicine or changed any of the medicines they were taking in the last 2 months. This indicator is calculated by dividing the number of respondents who answered "yes" by the number of respondents who answered "yes or no" to the question: In the last 2 months, did Extra-Mural staff talk with you about when to take these medicines?

Notes

The 2021 edition of the Home Care Survey was conducted during the COVID-19 pandemic. While the pandemic did not influence the survey's response rate, users are advised to use the survey data with caution, especially when creating estimates for small sub-populations or when comparing it to other editions of the survey.
