About

This indicator is the percentage of citizens receiving home care services from the Extra-Mural Program who give a favourable rating of 8, 9 or 10 for services received from staff in the last 2 months (scale 0 to 10).

Source

Home Care Survey

Calculations

This indicator is calculated by dividing the number of respondents who answered "8, 9, 10" by the number of respondents who answered "0 to 10" to the question: Using any number from 0 to 10, where 0 is the worst home health care possible and 10 is the best home health care possible, what number would you use to rate your care from Extra-Mural staff in the last 2 months?

Notes

The 2021 edition of the Home Care Survey was conducted during the COVID-19 pandemic. While the pandemic did not influence the survey's response rate, users are advised to use the survey data with caution, especially when creating estimates for small sub-populations or when comparing it to other editions of the survey.
