About

This indicator is the percentage of parents or guardians of students in grades K to 5 who reported eating dinner with their child 5 days or more in the last week.

Source

Student Wellness and Education Survey, Grades K-5: Parent/Guardian Perspective

Calculations

This indicator is calculated by dividing the number of respondents who answered "5, 6 or 7 or more" by the number of respondents who answered "none, 1, 2, 3, 4, 5, 6 or 7 or more" to the question: Last week, how many times did you: c) eat dinner (evening meal) with your child?

Notes

Due to the very low response rate for the 2025-2026 parent questionnaire, survey results may not be representative of the overall student and parent population. Therefore, results should not be used for planning or comparing to previous editions of the survey. Some schools will not receive their K to 5 results due to the extremely low number of parents who responded.
