**About**

This indicator is the percentage of parents of students in grades K to 5 who are physically active with their child 3 or more days per week or guardian.

**Source**

Student Wellness and Education Survey, Grades 4-5

**Calculations**

This indicator is calculated by dividing the number of respondents who answered "often (3-5 times weekly) or very often (daily)" by the number of respondents who answered "never, rarely (less than 1 time weekly), sometimes (1-2 times weekly), often (3-5 times weekly) or very often (daily)" to the question: How often are you physically active with your child, playing active games, sports or physical activities?

**Notes**

Due to the very low response rate for the 2023-2024 parent questionnaire, survey results are deemed to be not representative of the overall student and parent population. Therefore, results at the school, district, sector, and provincial levels are not to be used for planning or comparing to previous editions of the survey. Some schools will not receive their K to 5 results due to the extremely low number of parents who responded.
