District scolaire francophone Nord-Ouest	<b>2.4</b>
--	------------

District scolaire francophone Sud	<b>1.5</b>
-----------------------------------	------------

Francophone sector	<b>2.2</b>
--------------------	------------

## About

This indicator is the percentage of students in grades K to 5 who have received a diagnosis for: language/Speech impairment, as reported by a parent.

## Source

Student Wellness and Education Survey, Grades 4-5

## Calculations

This indicator is calculated by dividing the number of respondents who selected "language/speech impairment" by the "total number of respondents" to the question: Has your child received any of the following diagnoses? If so, please select which one(s).

## Notes

Due to the very low response rate for the 2022-2023 parent questionnaire, survey results are deemed to be not representative of the overall student and parent population. Therefore, results at the school, district, sector, and provincial levels are not to be used for planning or comparing to previous editions of the survey. Some schools will not receive their K to 5 results due to the extremely low number of parents who responded.
