About

This indicator is the percentage of students in grades K to 5 who usually sleep 9 or more hours each night, as reported by a parent or guardian. This indicator is based on the Canadian 24 Hour Movement Guidelines for Children and Youth.

Source

Student Wellness and Education Survey, Grades 4-5

Calculations

This indicator is calculated by dividing the number of respondents who answered "9 hours to less than 10 hours, 10 hours to less than 11 hours or 11 hours or more" by the number of respondents who answered "under 6 hours, 6 hours to less than 7 hours, 7 hours to less than 8 hours, 8 hours to less than 9 hours, 9 hours to less than 10 hours, 10 hours to less than 11 hours or 11 hours or more" to the question: How long do you think your child usually spends sleeping each night?

Notes

This indicator has been replaced by: SA_SLEST_1. Due to the very low response rate for the 2023-2024 parent questionnaire, survey results are deemed to be not representative of the overall student and parent population. Therefore, results at the school, district, sector, and provincial levels are not to be used for planning or comparing to previous editions of the survey. Some schools will not receive their K to 5 results due to the extremely low number of parents who responded.

Unit	Interpretation	NBHC code
