Newcomer, 2 years or less % 2024-2025	68.3
Recent immigrant, 5 years or less % 2024-2025	84.4
Self-identifies as a person with a disability or special need % 2024-2025	9.5
Identifies with racialized groups % 2024-2025	14.5

Child's healthy lifestyles

Province
New Brunswick

weights

Overweight and obesity in childhood and adolescence have been associated with elevated health risks and morbidities, and increased mortality rates in adulthood. They are risk factors for a large number of serious diseases and conditions like high blood pressure, heart disease, diabetes, stroke, some cancers, and mental health problems.

Overweight or obese % 2024-2025	31.3
-----------------------------------	------

Movement and rest

Daily physical activity, 1 hour or more % 2024-2025	80.1
---	------

Sleeps 9 hours or more, week days % 2024-2025	98.5
---	------

Healthy eating

Canada's Food Guide recommends eating a variety of healthy foods each day, including plenty of vegetables and fruits. It also recommends to eat without distractions.

Eats vegetables or fruits 5 or more times per day % 2024-2025	44.7
---	------

Did not eat meals while watching TV last week % 2024-2025	38.7
---	------

Ate meals 3 times or more while watching TV last week % 2024-2025	35.1
---	------

Second-hand smoke

People allowed to smoke inside home % 2024-2025	0.8
---	-----

People allowed to smoke inside family vehicle % 2024-2025	1.6
---	-----

Parents'/guardians' healthy lifestyles

Parent/guardian is physically active with child, often and very often % 2024-2025	31.1
---	------

Reports they or someone they live with smokes cigarettes % 2024-2025	17.1
--	------

Parent/guardian ate at a fast-food place with child 3 times or more, last week % 2024-2025	4.5
--	-----

Engages in leisure reading % 2024-2025	87.6
--	------

Eats vegetables or fruits 5 or more times per day % 2024-2025	43.4
---	------

Eats highly processed foods 1 time or none per day % 2024-2025	46.7
--	------

Drinks sugary drinks % 2024-2025	49.4
------------------------------------	------

Province
New Brunswick

Eats the evening meal with child, daily % 2024-2025	60.4
Eats the evening meal with child, most days % 2024-2025	83.0
Eats breakfast daily % 2024-2025	58.8
Moderate or vigorous physical activity, most days % 2024-2025	74.3
Has more than 2 hours of screen time, most days, except working hours % 2024-2025	14.3
Engages in leisure activities, most days % 2024-2025	85.8

About this Table

Content and description

This table presents data collected from parents/guardians of students in kindergarten to grade 5 through the New Brunswick Student Wellness and Education Survey (SWES). Some of the data is about children, while some is about parents/guardians, because according to the scientific literature, parents' behaviours have an impact on children's behaviours.

Why it's important

Only when we understand who our students are and what their needs are can we better plan for services and allocate resources to meet their health and educational needs.

Availability of the data

Due to the very low response rate for the parent/guardian questionnaire, some schools will not receive their K to 5 results due to the extremely low number of parents/guardians who responded. While schools will be able to compare their results in this data table to their school district, school sector and overall New Brunswick, these results will not be available on the NBHC web site for the 2023-2024 edition of this survey.

Due to this very low response rate, survey results are deemed to be not representative of the overall student and parent/guardian population. Therefore, results at the school, district, sector, and provincial levels are not to be used for planning or comparing to previous editions of the survey.

More information is available on our [New Brunswick Student and Education Wellness Survey](#) page.

Note about demographic groups:

In 2023, the NBHC undertook a review of the demographic questions in its surveys to more accurately report on the experience of citizens who identify with particular groups. As such, starting in 2024, all demographic groups (characteristics) have been adjusted to reflect this change. Data tables and indicator pages were adjusted to allow for trending where applicable.
